

more than tech, more than data: IT jobs

maria kassotaki + thanos loumproukos

business specialty managers, technology | randstad hellas.

agenda.

changes. 4

hot IT jobs. 6

are you an IT graduate? 8

are you a professional? 10

what companies are seeking. 12

what can we do for you. 14

changes are here

are we ready?

what has changed in the **IT** market.

salaries increase.

(20-30% @ 2022 vs 2021)

high mobility.

the highest of the last 10-15 years

working model.

- traditional (office)
- fully remote
- hybrid (combination)

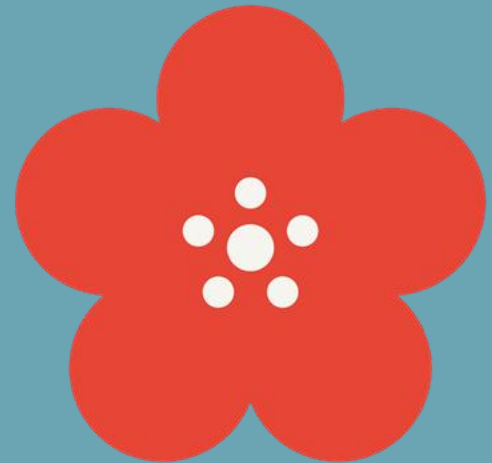

hot IT jobs now.

7 hot IT jobs.

- developer (PHP, java, .NET/C#, javascript, python etc)
- QA software tester
- cyber security engineer
- devops / cloud engineer
- IT systems / networks engineer
- ERP / SAP professionals
- IT helpdesk / support officer

are you an IT graduate?

we've got your roadmap.

how to start your IT career.

focus (choose the field, trainings, bootcamps, certifications etc.)

get (very) well prepared

CV (with technologies)
LinkedIn profile
github etc.

be realistic
be professional

knock the right doors (large companies, job adverts from various channels)

create your future

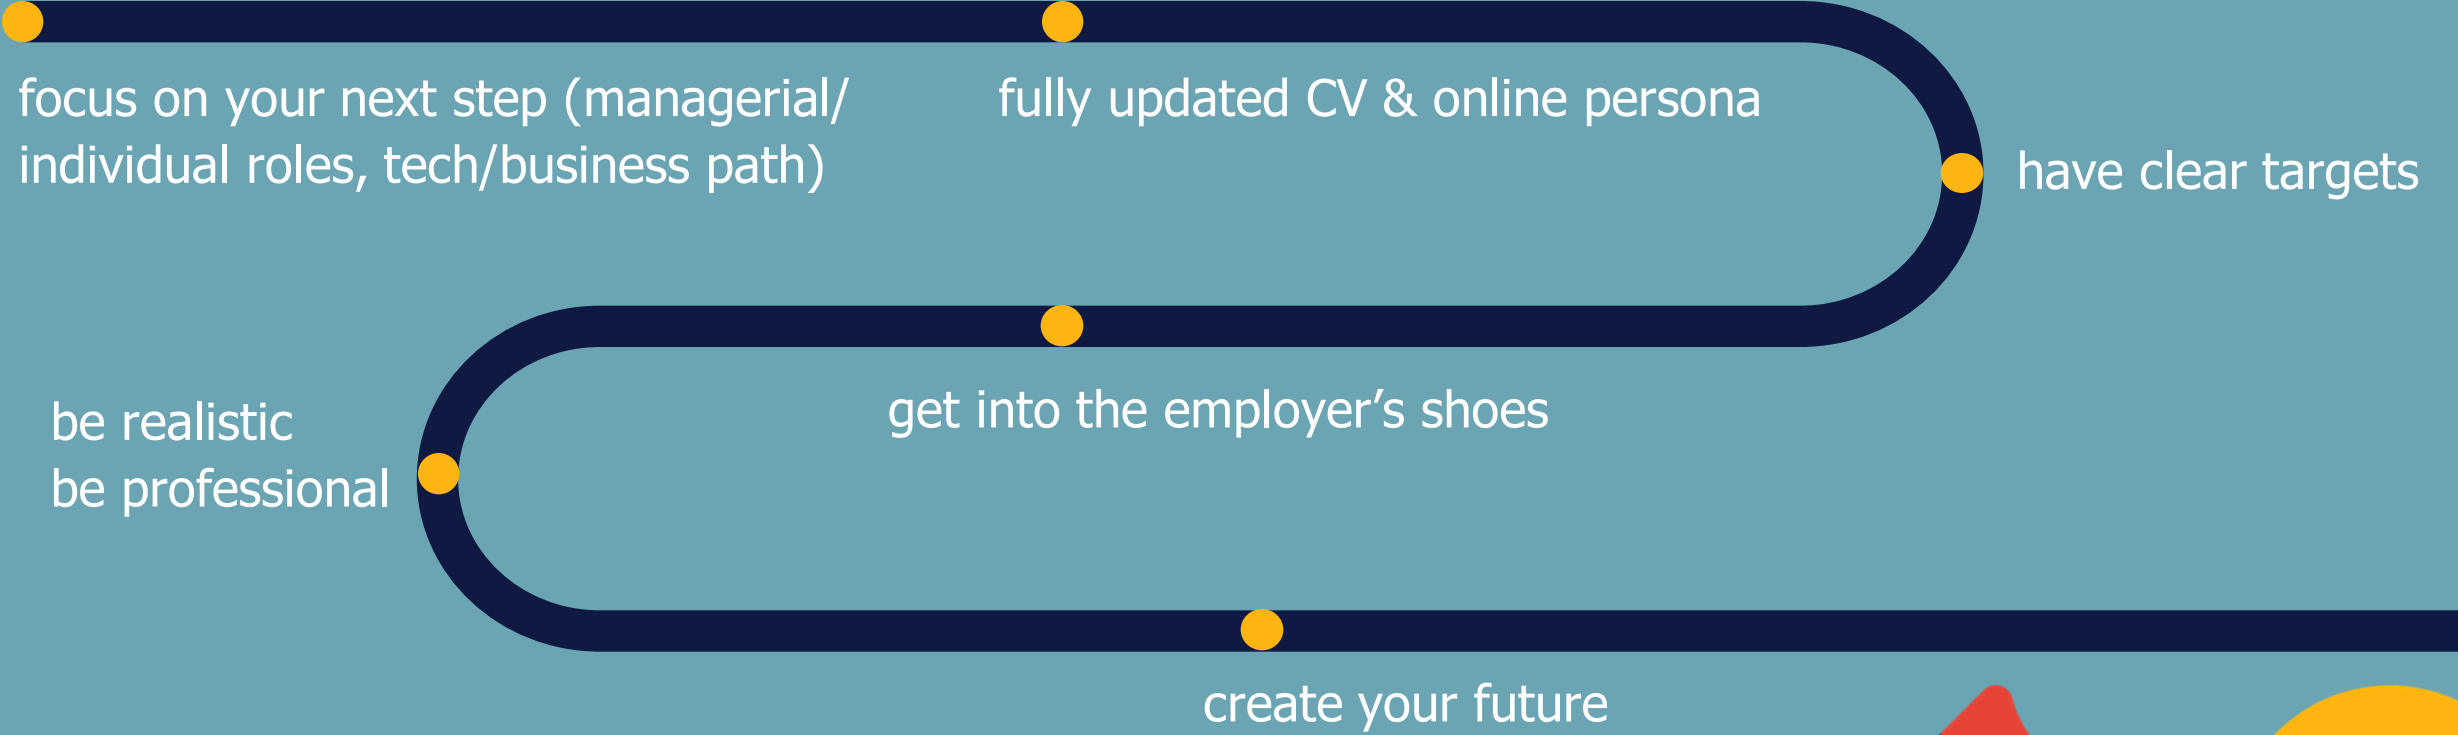

are you a professional?

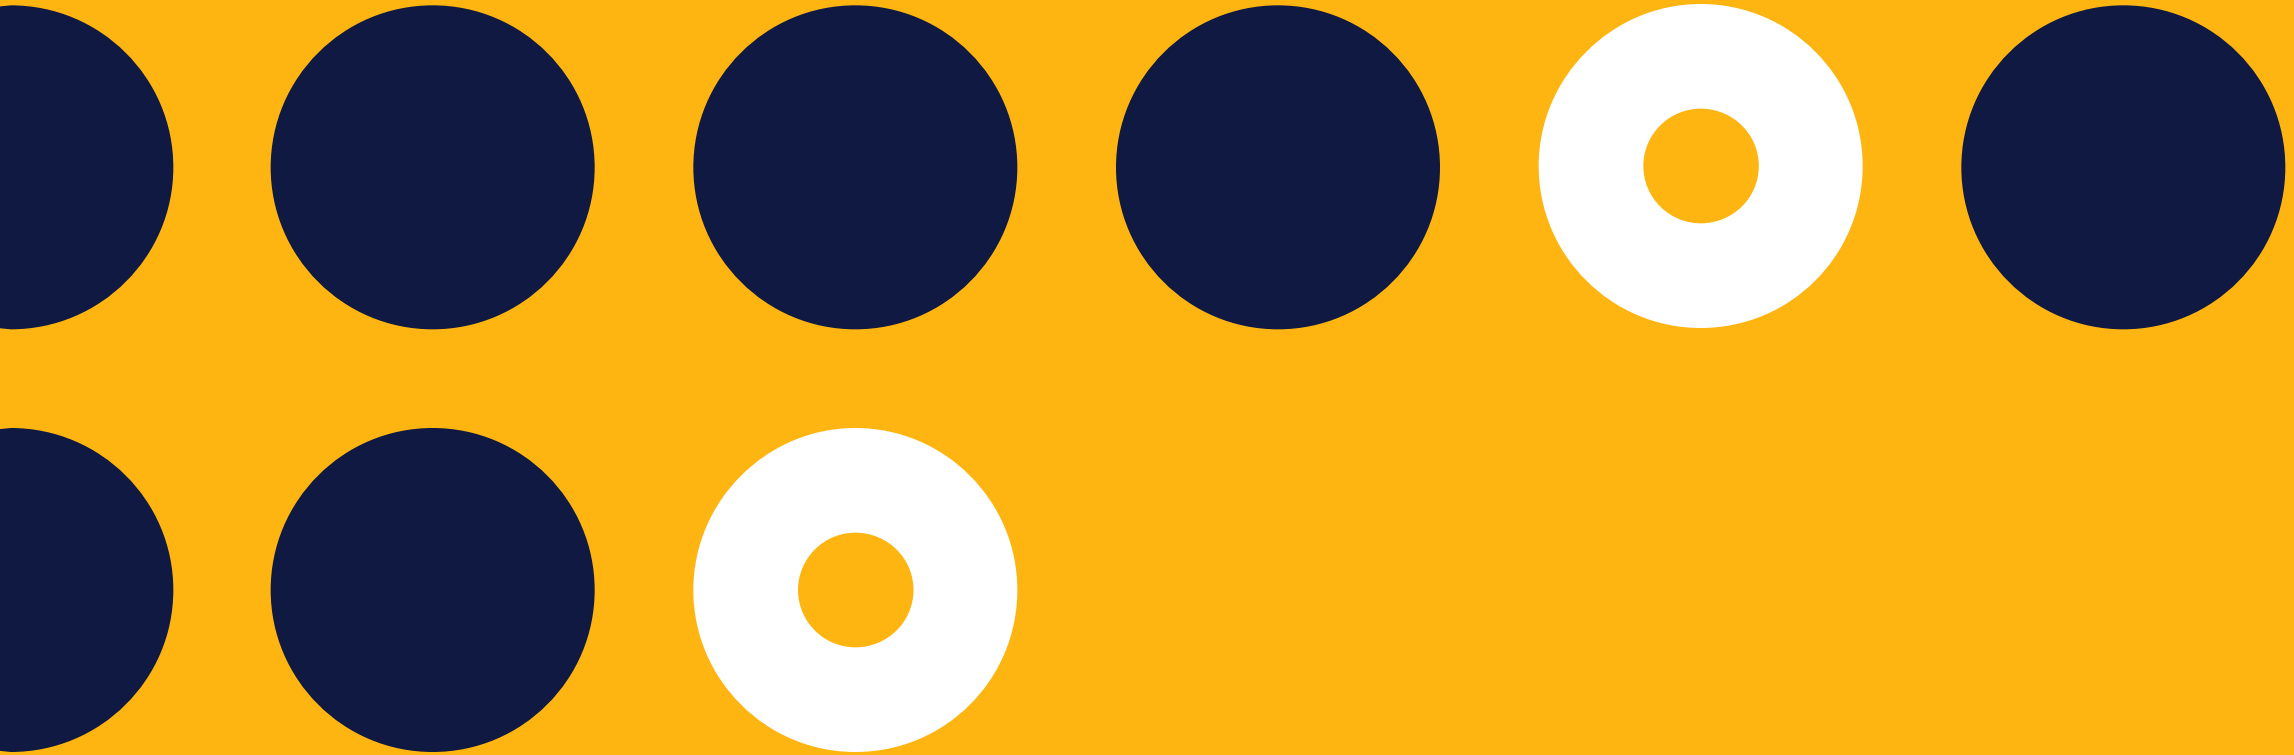

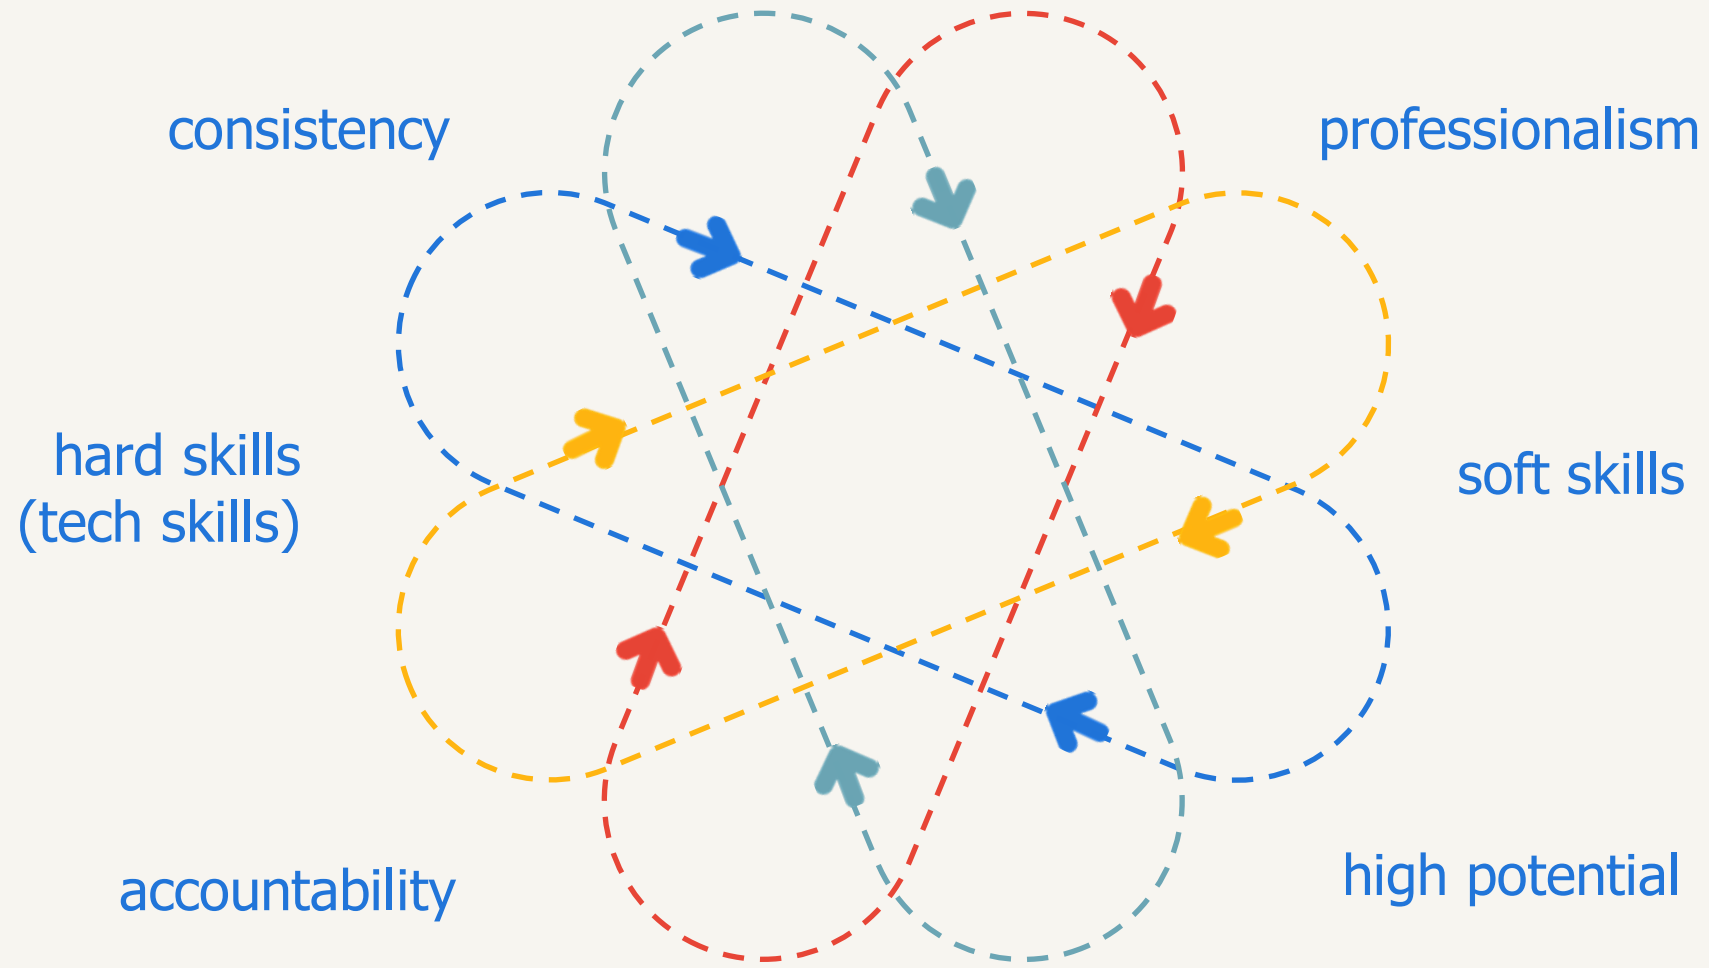

how you can grow.

how to grow your IT career.

what companies are seeking.
